  John Greene Real Estate represented Hyundai Translead in two Will County manufacturing leases. Over the three-year site selection process, Hyundai Translead's requirement grew from less than 100,000 S.F. to over 2.2 million S.F., requiring the team to continually adapt its strategy – from existing facilities to ground-up build-to-suit options and ultimately a two-building solution at 2200 Channahon Drive and 3835 Youngs Road. Hyundai Translead plans an initial $450 million investment to retrofit the facilities. Once operational, the facilities are expected to support approximately 2,500 jobs.
